

As many of you know, Mason has started using the Envision Math program. You can access the materials online. Please follow these steps:

1. In your address bar, type www.pearsonrealize.com
2. Click on "Sign in".
3. Type in your student's user name. It should be the word "mason" followed by their first name, then their last name, no spaces. For example, my login would be: masonbrandiecox
4. Type in your student's password. It should be the word "eagles" followed by a two-digit number given to them by their teacher. Numbers are assigned alphabetically by class. For example, mine would be: eagles 01
5. You can look at the student's textbook by clicking on "Programs", then clicking on the book. This will bring you to the Table of Contents, where you will find the 8 mathematical practices your student will need to be able to do, and all the topics for the year.
6. Click on your student's current topic. Most topics include a topic opener and vocabulary cards. They also include all the lessons for that topic.
7. Choose your student's current lesson. Inside the lesson, you will find the Common Core Review, Develop the Concept Video, all 3 levels of Homework, and both Center Activities.
8. Current assignments can be found by clicking on "Classes". Grades will not be reflected in the "Grades" tab found at the top.
9. To sign out, click on the  symbol in the upper-right corner, and select "Sign out".

I look forward to seeing you at our Envision Workshop that will take place before the PTA meeting on October 21st from 5:00-6:30.

☺ Brandie Cox, Math Interventionist
